

Point of Sale

about

All-in-one retail management solution. With Point of Sale, Mobile Inventory App, Kitchen Display System, Kiosks, Mobile Ordering Server App, Reward, Gift Cards, Online Ordering, E-Commerce and Multi-Store management, we offer seamless retail management experience.

Hybrid System

Sync sales, menu items, payments and customer data across all devices and stores. When you add inventory, you can pull item description right from the web saving you time. Database is stored locally and on the web for speed, accessibility and availability. Our retail management suite is not limited to retail business only, our system can handle Quick Order Service as well.

PRODUCT SEARCH KIOSK

Allow your customers to easily pull information about stock location, price, and inventory level.

Seamless Integration

Point of Sale, Online Order, E-Commerce, Kiosk, and Mobile Inventory App are all integrated. You can view all orders from different order taking applications through Kitchen Display System. You can do all your inventory with the mobile inventory app.

Offline and Online

Your business should never stop running even when internet is down. The offline mode let's you do just that. When internet comes back up everything syncs automatically.

INVENTORY MANAGEMENT

Inventory management is important in retail business. You can breeze through repetitive inventory tasks with automated item description importing. Automatically breakdown case units into single items without opening the box. With reorder level quantity your inventory will never run out of stock.

DISCOUNTS & PROMOTIONS

It is needless to say that in retail business appropriately executed discounts and promotions can increase sales but, without control they can cause financial losses. Flexible multi-tiered discounts and promotions rules paired with tools to manage them are all part of CloudHood Point-of-Sale Promotion Manager.

Retail Business with QSR

Whether you have ten menu items or one hundred, you can build your menus easily. Kiosks, online order, and mobile app ordering pulls the menu from your Point-of-Sale so that you only have to do the menu only once. Of course, forced modifiers, meal service time, special occasion, and inventory items are all supported.

MOBILE INVENTORY APP

With our Mobile Inventory App you can make inventory tasks easy. You can scan barcodes using the phone's camera. Add, Edit, Recieve PO, and much more with the Mobile Inventory App.
